Type of category	Verticality
Category	Harnesses
Sub-category	Chest Harness

CHEST'AIR

The CHEST'AIR chest harness transforms the FALCON, FALCON MOUNTAIN, AVAO SIT and SEQUOIA SRT seat harnesses into full-body suspension harnesses. Connects simply to the harness ventral attachment point for rapid installation. It adapts easily to all body types with its DoubleBack self-locking buckles on the shoulder straps and ventral strap.

Running the strap over the upper back improves comfort by distributing the weight of the user over the shoulders.

CHEST'AIR

Short description Chest harness for seat harnesses

Selling points

- Transforms the FALCON, FALCON MOUNTAIN, AVAO SIT and SEQUOIA SRT seat harnesses into full-body suspension harnesses
- Connects simply to the harness ventral attachment point for rapid installation.
- Textile sternal attachment point does not interfere when not in use
- Ventral straps and shoulder straps equipped with DoubleBack buckles to quickly adapt the chest harness to all body types.
